Grant Writer

Role Description

If you're passionate about fund raising, we need to talk. We're looking for a flexible and versatile grant writer who will be responsible for writing compelling proposals that will bring in additional funding and help us achieve our goals.

The Grant Writer will be responsible for all aspects of our non-dilutive funding strategy from identifying suitable funding, writing successful proposals, presenting to awards committees and post award management. The range of funding we will be accessing is wide and exciting. Everything from relatively small project grants through to working with Government on multi-million pound sector challenges. You are also likely to be involved in our equity fund-raising activities as well.

This role represents the opportunity to make a significant impact on our business by delivering its on-going funding needs.

To be successful in this role, you should have hands-on experience with a range of UK and European grant funding sources and a track record of successful applications.

A more detailed role and job description is available by contacting us at jobs@biosignatures.com

Package

Job Type: Full-time

Salary Range: up to £45,000 depending on skills, experience and track record of winning grants/funding.

Benefits: including 25 days holiday, pension scheme and flexible working.

Desired Background and Skills

We're really flexible on academic qualifications, just show us you're a good grant writer. However, to be successful you're likely to have:

- BSc degree in creative writing or a related field. Candidates that are qualified by experience/track record will be also be considered.
- Minimum 2 years experience in grant writing, ideally with exposure to the main UK grant funding bodies.
- A desire to make a positive impact on the world.
- Demonstrable passion for fund-raising and writing compelling proposals.
- Ability to effectively communicate complex ideas, both verbally and in writing.
- No specific product knowledge is needed as full training will be provided but candidates should be able to demonstrate the ability to quickly understand complex products and routes to market.

Desirable experience that would be a bonus but is not essential:

- Experience of main European grant bodies and a track record of success in winning grants.
- Experience of dealing with multi-million pound Government funded grant applications and/or applying for grants under major Government sector funding competitions.
- Prior experience in science, life sciences or diagnostics.

How to Apply

Send your CV and anything else you think supports your application to jobs@biosignatures.com and we'll get in touch.

About Biosignatures:

Imagine how many lives we could save if we could diagnose disease long before symptoms became apparent. How many people would live longer, have more productive lives, have a better quality of life and have more time with their loved ones? That's our mission at Biosignatures, we want to transform lives by diagnosing disease early.

Our cross disciplinary team spans clinical trial initiation and management, biobanking, sample processing, biochemistry, proteomics, glycomics, fluorescent image analysis, AI, bioinformatics, biostatistics and diagnostics.
